Reliability diagram, cross-validation (10 equal-count bins)
Share of severe incidents: 22.6%
Constant-prevalence Brier: 0.175
Platt parameters fitted in each fold
636 predictions per bin (6,355 in total)
Perfect calibration
Raw scores (Brier 0.208)
After Platt scaling (Brier 0.156)
Observed share of severe incidents
